Project Proposal for Ph.D.

## Project Details

<table>
<thead>
<tr>
<th>Project Title</th>
<th>Computational Social Choice</th>
</tr>
</thead>
</table>

### Project Summary

This is an interdisciplinary project at the intersection of economics and computer science that brings together ideas from game theory, mechanism design, and algorithm design.

The primary focus of this project is to investigate problems in social choice theory, which is a classical area of economics concerned with decision-making based on the conflicting preferences of multiple agents, from a computational perspective. The aim is to identify desirable economic properties and devise efficient algorithms to achieve them. Example problems include voting, matching, and fair division.

<td>Rohit Vaish</td>
<td>CSE</td>
<td><a href="mailto:rvaish@iitd.ac.in">rvaish@iitd.ac.in</a></td>
</tr>
</tbody>
</table>

---

### Project requirements (Student qualifications, experience required, etc)

*The candidate will be shortlisted based on common shortlisting criteria decided by ScRC (SIRe)*

- **Mandatory**: Discrete Mathematics (or equivalent course). The candidate should be comfortable with reading and writing mathematical proofs.
- **Recommended**: Prior experience in Game Theory, Microeconomics, and Design and Analysis of Algorithms is recommended but not mandatory.

---

### Source of fellowship/funding

(CSIR/UGC/DBT/ICMR/ICAR/NEET-PG/DST-INSPIRE/IRD/FITT Project details, if any)

DST INSPIRE grant (DST/INSPIRE/04/2020/000107)

---

### Role of Faculty Members involved:

- **Supervisor-1**: Saptarshi Mukherjee will supervise the economics side of the project through his expertise in microeconomic theory, game theory, and mechanism design.

- **Supervisor-2**: Rohit Vaish will supervise the computer science side of the project through his expertise in algorithm design.
