The School of Interdisciplinary Research (SIRe) was founded in October 2017 with the objective to create a platform for promoting research across different disciplines at IIT Delhi. It is envisioned that the school with its multi-disciplinary nature will not only accelerate its growth but would also enable to engage with faculty across other Institutes like AIIMS, JNU, NII etc. It is expected that over a period of time the school would be able to "seed" a number of interdisciplinary programs that do not exist today. The school has more than 120 faculty & more than 80 students.
